Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Wednesday 20 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cold and wet with persistent rain and hill snow.

Today:
A cold and wet day with outbreaks of rain and drizzle. Rain will turn heavy at times, especially during the afternoon and over southern and western parts of the region. By early evening, snow will develop over hills. Maximum temperature 6 deg C (43 deg F).

Tonight:
Rain, sleet and hill snow continuing overnight with further heavy bursts likely. Becoming windy during the second half of the night and remaining cold. Minimum temperature 0 deg C (32 deg F).

Thursday:
Outbreaks of rain, sleet and hill snow gradually clearing through Thursday morning. Thereafter, sunny spells and scattered wintry showers. Very windy and bitterly cold with gales over hills and coasts. Maximum temperature 4 deg C (39 deg F).

Outlook for Friday to Sunday:
Cold and windy on Friday with sunshine and scattered wintry showers. Less windy over the weekend with some sunshine and a few wintry showers. Widespread frost overnight.
